We offer our products to many market segments as a motor fan company and over the period of time we have successfully expanded to various markets like

- Marine works
- Nuclear Power Plants
- Highway Tunnels
- Steel Industries
- Oil Factories
- Energy Industries
- Iron Industries
- Solar Industries

A pulse jet dust collector is a type of suck and filter machine, wherein dust is collected from dust laden air that has been pulled into it and clean air is then discharged. In an industrial environment, it is vital to have clean surroundings and this device is used for this purpose. In industries, various work processes or production activities can result in dust spreading in the air. Cleaning it up cannot be done easily leading to poor working conditions. It is in such situations that using a dust collector becomes important.

Components Of Pulse Collector Systems

1. Filter bags
2. Pulse venturi
3. Cleaning cycle controller
4. Air plenum
5. Dust hopper
6. Fan

Key Features Of Pulse Dust Collector Systems

1. High-efficiency filtration for fine dust capture.
2. Low-pressure operation for energy efficiency.
3. Automatic cleaning for continuous operation.
4. Versatile applications in various industries.
5. Compact design for space-saving installation.

PULSE DUST COLLECTOR SYSTEMS

Pulse jet dust collectors suck dust-laden air, filter it, and discharge clean air to maintain clean industrial environments.

WHAT DO WE OFFER

We offer state of the art services and industrial products. Feel free to contact us on our social media handles and on our website.

HOW TO REACH

1. Jnpt port - 35 km
2. Sahar Air Cargo - 20Km
3. Railway station - 5Km
4. Vasai Highway - 200m
